Welcome to 2019 Community Engagement Conference!

Designated as a Carnegie community-engaged institution, Ohio State continually reaffirms its land-grant promise to the people of Ohio, the nation, and the world. Through teaching, research and engagement, we consistently have a measurable impact on resolving the issues of our time.

**Sustainability** is motivated by the fundamental dependence of humans on the natural environment, including air, water, and land resources, and the desire to foster life on Earth now and in the future. It focuses on improving the well-being of people and communities by protecting earth’s life support systems, reducing environmental impacts, and enhancing resource efficiency. Sustainability also depends on the **resilience** of natural and human systems, such as those providing energy and food, and the ability of communities to recover, adapt and flourish in the face of changing environmental, economic, and social conditions.

---

**The Ohio State University Engagement Vision**

The Ohio State University will be a recognized community-engaged institution by solving societal challenges through its meaningful partnerships with the people and institutions of Ohio, the nation, and the world.

#osuengages
Welcome

Building on the success of 2018, this conference brings together a range of community engagement practitioners to share diverse ideas, participate in robust discussion, and actively develop networks to address complex questions.

Faculty, staff, students, and community partners can explore the importance and impact of community-university partnerships with many opportunities for professional development and making connections. The array of learning opportunities are designed to increase our collective capacity to initiate, build, and sustain community engagement projects.

Learn from our keynote speakers what’s happening elsewhere, learn how other unique partners have enhanced their community space with projects, think creatively, and network with current and potential partners.

The Ohio State University Partnership Principles

Meaningful partnerships, which enhance impact by promoting innovation and relevance, are built on the principles of:

- **Awareness of partner needs** associated with values, assets, and challenges
- **Shared resources and responsibilities** leveraging strengths for mutual benefit and collective impact
- **Accountability through evidence** in practice and evaluation
- **Commitment to stewardship** ensuring trust, compromise, efficiency, and sustainability
- **Recognition of successes** affirming the value of partnerships
